

Table of contents

Foreword	7
1. Introduction	9
2. MicroRNAs: noncoding RNAs	12
3. MicroRNAs and cardiovascular diseases	21
4. MicroRNAs and the pathophysiology of atherosclerosis	31
4.1. MicroRNAs as regulators of atherosclerosis	32
4.2. Specific microRNAs with distinct roles in the regulation of atherosclerosis	33
4.3. MicroRNAs, inflammation, and atherosclerosis	36
4.4. Exogenous modulation of microRNAs expression and atherosclerosis	38
5. MicroRNA expression profiles in stable atherosclerosis	47
5.1. Coronary atherosclerosis	48
5.2. Lower extremity, carotid and renal atherosclerosis	48

5.3. Common microRNA expression profile in atherosclerosis of different arterial territories	50
5.4. Multiterritorial atherosclerosis	51
5.5. Biological variation of microRNAs expression levels	52
6. MicroRNAs and multiterritorial atherosclerosis	55
6.1. Investigating circulating microRNA profiles in single- and multi-territorial atherosclerosis	56
6.2. Our research	59
6.2.1. MicroRNA profiles according to single- and multi-territorial atherosclerosis and severity of atherosclerosis in different territories	62
6.2.2. Cigarette smoking toxicity, microRNAs, and lower extremity atherosclerosis	66
6.2.3. Tumor necrosis factor alpha and microRNAs expression	69
7. Future directions	77
